# Enabling Limited Thermostat Adjustability
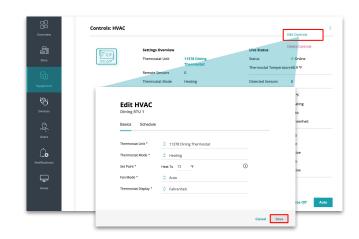

energybox

1 Click the Devices tab within a Site menu, and select the Thermostat/ Equipment that needs adjustment.

Click the "**Mapped Equipment**" button.

2 Click the 3 vertical dots in the top right corner of the Controls: HVAC section, then click "**Edit Controls**".

3 Scroll to "**Advanced Settings**". To enable local adjustment, toggle the button to "**On**". This will allow the user to set the setpoint limits to +/- 1 or 2 degrees and set the timer for when temps should return to original values. Click "**Save**".

Click the "**Auto**" button on the bottom right and then select the "**Confirm**" button to finalize set points.
