

SiteHero™

SiteHero™ keeps us constantly connected to our locations and alerts us to any problems before they affect our business.

Automate your workflow to increase efficiency and reduce costs

SiteHero automates your operations by monitoring key temperatures and door access in real-time with a tiered notification system that alerts you of any deviations in equipment and environments.

Actionable insights for operational irregularities

Driven by AI technology, a multi-tiered notification system is set in motion to provide you with actionable insights for operational irregularities.

24/7 Multi-site monitoring

Conveniently access real-time and historical data for equipment and areas across all of your sites.

Benchmark equipment and site performance

Manage all of your sites through one centralized platform and benchmark equipment and site performance.

Multi-tiered email notifications system

Cutting-edge wireless sensors track temperatures, door access and environmental conditions across all of your locations in real-time.
