

DispenserSentry™

Monitor dispenser activity to protect customers from fraud and maintain company reputation

DispenserSentry provides real-time monitoring of your fuel dispenser door access across all of your sites to protect your customers and brand from unauthorized access and fraud.

Receive instant alerts when a fuel dispenser has been compromised
Receive real-time notifications and audible alarms to increase the response time and prevent fraud.

Track fuel dispenser access in real-time
Digitize and automate your inspection process to reduce manpower, ensure accuracy and reduce costs.

Protect your customers and your brand
Reduce liability with the automated dispenser audit feature which provides historical details on any authorized or unauthorized access to your dispensers.

Stay connected to your sites and equipment
Be connected to your fuel pump locations from anywhere.
