

# EnergyTracker™

EnergyTracker™ makes sure our equipment is on and working when it should be, across thousands of sites.

## Monitor energy consumption to increase energy efficiency and reduce your monthly energy bill

EnergyTracker monitors energy consumption across your sites to increase energy efficiency, avoid downtime and prevent equipment failure.

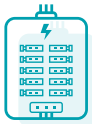

### Real-time monitoring and notifications

Real-time monitoring and tiered notifications to avoid equipment downtime and optimize energy usage.

### Gain the ability to benchmark equipment efficiency

Benchmark equipment performance and site efficiency on energy consumption.

### Access detailed energy breakdown

Gain detailed energy data of your equipment so you can take necessary actions, save on costs, and surpass your sustainability targets

### Performance Insights

Collect real-time status and performance insights from cutting edge, energy tracking sensors connected to all of your electrical circuits.
